Nutro Products is not an NPL site. Looks like it is in site assessment phase. Maybe Chris Villarreal or Bret Kendrick can provide info.

Can we keep Houston Health Department informed of our plans and actions in her area. Also, is anyone familiar with Nutro Products Corp.

Thank you Bryant. Please keep me updated. I would also like the data to be shared with us for tracking and planning our own sampling.

You mentioned that EPA took surface water samples at Arkema. Can you please

share that with us?

No one called me from enforcement regarding Valero. There was communication with an EPA and a health department engineer, Isaac Desouza.

Ms. Raun – thank you for reaching out to the REOC. From our conversation, you are interested in what sampling will be done around Superfund Sites and other industrial facilities in the Houston area. I will touch base with our folks here to see what I can find out about Nutro Products Corp.

Loren – Just checking to see if anyone had reached back to you on your request? With staff deploying from the EOC to the Field, I want to make sure something didn't fall

through the cracks.

Did any one get back to Houston health department? I just read in the updated report about SF site assessments.
